## Topics

- In 2022, section 1006.29, Florida Statutes, was amended by House Bill 1467 to require the Florida Department of Education to develop an online training program for librarians, media specialists, and other personnel involved in the selection and maintenance of library collections. The law requires that this training be made available to Florida educators on January 1, 2023. As part of the LAC committee, I am required to show the first 35 minutes to the committee.
